

# R410A R22 Triple DC Inverter Air Conditioner

Air conditioning units feature R410A and R22 refrigerant compatibility with a triple DC inverter system. These systems are designed for efficient cooling and heating in residential and commercial environments, offering precise temperature control and energy savings through inverter technology.

## Overview

### High-Efficiency Triple DC Inverter System

This advanced climate control system utilizes a triple DC inverter architecture to provide precise temperature regulation and superior energy efficiency. Designed for versatility, the series supports both R410A and R22 refrigerants to suit diverse installation requirements. It offers a comprehensive solution for residential and commercial spaces, featuring multiple form factors including ceiling cassette, slim duct, and wall-mounted units.

## Technical Specifications

Refrigerant Support	R410A, R22
System Architecture	Triple DC Inverter

## Available Configurations

### Available Unit Form Factors

- Ceiling Cassette
- Slim Duct
- Wall-Mounted
