

R600a Refrigeration Compressor

This hermetically sealed compressor is designed for refrigeration applications using R600a refrigerant. It features a robust motor, optimized cooling performance and a compact design.

Overview

High-Efficiency Refrigeration Compressor

This hermetically sealed compressor is specifically engineered for refrigeration applications utilizing R600a refrigerant. It features a robust motor design optimized for superior cooling performance in a compact form factor. Ideal for refrigerators, freezers, and small cooling appliances, it delivers reliable operation characterized by low noise and minimal vibration levels.

Technical Specifications

Refrigerant	R600a
Model Number	HJ160010R
Suitable Applications	Refrigerators, Freezers, Small Cooling Appliances

Performance Features

Key Performance Indicators

1 Low

Noise Level

1 Low

Vibration Level

Design Benefits

- Hermetically sealed construction
- Robust motor design
- Optimized cooling efficiency
- Compact footprint

Compliance

Country of Origin

Made in China
