

R600a Refrigerators with Steel Glass Panel

These refrigerators utilize R600a refrigerant, reducing global warming potential and protecting the ozone layer. Available in multiple models and colors, they feature steel glass panels and high-efficiency compressors.

Product Overview

Eco-Friendly Refrigeration Solutions

These premium refrigerators utilize R600a refrigerant, which minimizes global warming potential and protects the ozone layer for a sustainable cooling experience. Designed for professional use, these models feature high-density insulation and optimized cooling systems to maintain freshness. With sophisticated steel glass panels in multiple colors and advanced internal features like activated carbon deodorization, these units combine aesthetic appeal with high-performance functionality.

Key Features

Highlighted Capabilities

- R600a Environmentally friendly refrigerant
- Activated carbon deodorizer
- High-efficiency compressor
- Overall bending technology
- Precision steel/copper pipe construction
- Rapid cooling functionality

Design & Aesthetics

Color Options	White, Champagne Gold, China Red
Panel Finish	Steel Glass Panel

Technical Specifications

Model Variants

Model	Features
BCD-210	Standard high-density insulation, wide door
BCD-212H	Rotating candy box included

Comfort & Utility

Lighting	Luxury LED Top Light
