

R6P Carbon-Zinc Batteries

Set of four carbon-zinc batteries, size R6P, designed for general-purpose use in various electronic devices. These batteries provide a reliable and economical power source for low-drain applications.

Product Overview

Reliable Power for Everyday Devices

These R6P carbon-zinc batteries are designed as an economical and dependable power solution for low-drain electronic devices. With a nominal voltage of 1.5V, they provide consistent energy for household essentials. This pack is specifically optimized for applications such as remote controls, wall clocks, and simple toys.

Technical Specifications

Nominal Voltage

1.5 V Voltage

Chemistry	Carbon-zinc
Battery Size	R6P

Packaging & Usage

Recommended Applications

- Remote controls
- Toys
- Clocks
- Low-drain electronic devices

Packaging	Shrink-wrapped set of four
