

Rackmount Uninterruptible Power Supply

This rackmount uninterruptible power supply (UPS) offers battery backup and surge protection for sensitive electronics. It ensures continuous power during outages to prevent data loss and equipment damage.

Overview

Professional Rackmount UPS Solution

This rackmount uninterruptible power supply ensures continuous power delivery for your sensitive electronic equipment during outages. Designed for high reliability, it provides essential battery backup and advanced surge protection to prevent data loss and hardware damage. The system includes integrated communication ports and a user-friendly interface for seamless remote monitoring and configuration management.

Key Features

Primary Capabilities

Battery Backup, Surge Protection, Rackmount Design, Remote Management

Connectivity

Output Interfaces

- Multiple output receptacles
- Communication ports for remote monitoring

System Status

Interface Type

Integrated LCD/User-friendly control interface
