

Radial Arm Drilling Machine

This radial arm drilling machine is used for drilling, reaming, tapping, and spot-facing operations. Its radial arm swivels around a central column, allowing the drill head to be positioned over a wide area, and the drill head moves vertically along the arm.

Product Overview

Versatile Radial Drilling Solution

This radial arm drilling machine is a highly versatile tool engineered for professional-grade drilling, reaming, tapping, and spot-facing. Its radial arm design allows for 360-degree rotation and flexible positioning over large or irregularly shaped workpieces. Equipped with a powerful motor and variable speed control, it provides the precision and robustness required for demanding industrial applications.

Technical Specifications

Operational Flexibility

- Radial arm rotation around central column
- Vertical drill head adjustment
- Variable speed drive system
- High-rigidity worktable support

Application Compatibility

Large Workpieces • Irregular Shapes • Multi-Material Processing

Safety and Compliance

Integrated Safety Systems

Emergency Stop, Operational Interlocks, Safety Guards
