

Radial Drilling Machine

This radial drilling machine is designed for drilling, reaming, and tapping operations on large and heavy workpieces. The radial arm allows the drill head to be positioned over a wide area, providing flexibility in machining various parts.

Overview

High-Performance Radial Drilling Machine

This radial drilling machine is engineered for precision drilling, reaming, and tapping operations on large and heavy workpieces. Featuring a versatile radial arm, it allows the drill head to be positioned over a wide area, offering unmatched flexibility for complex machining tasks. Built with a powerful motor and a sturdy, stable base, it ensures consistent performance and accuracy for demanding industrial applications.

Technical Specifications

Model Number	Z3050X12Z
Machining Operations	Drilling, Reaming, Tapping

Key Features

Performance Highlights

50 mm

Max Drilling Diameter

1200 mm

Max Arm Radius

Design Advantages

- Adjustable radial arm for wide-area positioning
- Heavy-duty motor for efficient material removal
- Reinforced base for vibration-free operation
- Stable worktable for secure workpiece clamping
