

Radial Fan Impeller

Radial bladed fan impeller designed for air movement applications. It is constructed from durable plastic material and provides efficient airflow and quiet operation.

Product Overview

High-Efficiency Radial Fan Impeller

This radial bladed fan impeller is engineered for optimal air movement in a variety of industrial and commercial applications. Featuring a robust design with multiple curved blades centered around a central hub, it ensures efficient airflow and reliable performance. Constructed from durable, high-quality plastic, this component is an ideal solution for ventilation systems, HVAC units, and general air handling equipment.

Technical Details

Blade Configuration	Radial curved blades
Material	Durable plastic
Key Performance Features	Efficient Airflow, Quiet Operation, Rotational Support

Applications

Suitable Applications

- Ventilation Systems
- HVAC Units
- Air Handling Equipment
