

Radial Tile Cutter

The radial tile cutter is designed for accurate and efficient tile cutting. It features a diamond blade, water cooling system, and adjustable guide fence for clean and repeatable cuts.

Product Overview

Professional Precision Cutting

The TS1803 Radial Tile Cutter is a robust, high-performance machine engineered for precision and efficiency in tile installation. Featuring an integrated water cooling system and a smooth sliding table, it ensures clean, repeatable cuts while minimizing dust and protecting the diamond blade. Designed for both professionals and DIY enthusiasts, this cutter combines structural stability with advanced safety features for reliable operation on various surfaces.

Technical Specifications

Performance Metrics

1 Diamond

Blade Type

Core Features

- Integrated water cooling system
- Adjustable guide fence
- Sliding table mechanism
- Robust adjustable leg frame

Safety & Compliance

Safety Equipment

Blade Guard, Secure Clamping Mechanism, Overheat Protection

Application

Suitable Applications

Professional Installation • DIY Projects
