

Radiant Space Heater with Adjustable Stand

This radiant space heater provides efficient and directional heating. It features a sturdy base and adjustable stand for stability and customized positioning.

Overview

Efficient Radiant Heating Solution

The Radiant Space Heater features advanced parabolic heating technology designed for targeted warmth in home or office environments. Equipped with an adjustable stand, it offers customizable height and angle settings to ensure optimal heat distribution. The unit includes a wide-angle oscillation feature and is engineered with essential safety components like a tip-over switch for reliable daily use.

Performance

Heating Range	3 meters
