

Radiator Cleaning Brush with Angled Head

This radiator brush is designed with a long handle and angled head for reaching tight spaces. It features synthetic bristles secured with a metal ferrule, suitable for cleaning and painting radiators.

Product Overview

Versatile Radiator Cleaning and Painting Tool

This specialized brush features an angled head design, specifically engineered to navigate the tight spaces behind and within radiator fins. Equipped with a durable, long wooden handle, it provides the reach necessary to access difficult areas while maintaining control. The synthetic bristles are designed for reliability, making this tool an excellent choice for both cleaning maintenance and paint application in confined environments.

Design and Materials

Handle Material	Wood
Bristle Type	Synthetic
Key Features	Angled Head, Hanging Hole, Long Handle

Usage

Primary Applications

- Radiator cleaning
- Painting tight spaces
- Cleaning hard-to-reach areas
