

Railroad Hopper Car for Bulk Transport

This railroad hopper car efficiently transports bulk commodities. It is designed for efficient loading and unloading of materials.

Product Overview

Industrial Bulk Transportation Solution

This railroad hopper car is engineered for the high-capacity, efficient transport of bulk commodities. Designed for heavy-duty rail logistics, it facilitates seamless loading and unloading of granular materials such as coal, ore, grain, and fertilizer. Its robust construction ensures reliable performance for demanding supply chain and industrial transport requirements.

Technical Details

Model Identification	HFE247017-9
Railway Operator Code	EFVM

Features

Design Advantages

- High-capacity bulk containment
- Efficient loading mechanism
- Rapid unloading capability
- Durable rail-ready undercarriage

Commodity Suitability	Coal, Ore, Grain, Fertilizer
-----------------------	------------------------------
