

Railway Open-Top Wagon for Bulk Materials

This railway freight car is designed for transporting bulk materials, including coal, ore, and construction aggregates. Its open-top design enables efficient loading and unloading using cranes or other machinery.

Overview

C70 Open-Top Wagon

The C70 open-top wagon is a heavy-duty railway freight car specifically engineered for the efficient transport of bulk materials, including coal, ore, and construction aggregates. Built with robust steel construction, it provides exceptional durability and reliability in demanding industrial environments. The wagon features an open-top design that facilitates rapid loading and unloading via cranes or heavy machinery, while side doors offer additional flexibility for material handling.

Technical Specifications

Key Design Features

- Robust steel construction
- Open-top design for crane loading
- Side doors for manual/mechanical unloading
- Standard gauge wheel compatibility
- Integrated railway braking systems

Network Compatibility

Standard Gauge

Model Designation

C70KA

Primary Applications

Coal Transport, Ore Transport, Construction Aggregates
