Product Overview

Advanced Hydrophobic Glass Coating

This high-performance glass coating utilizes specialized fluoro-plastic and anti-corrosive agents to create a seamless, hydrophobic barrier on automotive glass. Once applied, the formula ensures that rain and moisture bead instantly upon contact, significantly improving visibility and driving safety during adverse weather conditions. The coating is designed for easy application and provides a long-lasting, smooth finish that maintains optical clarity on windshields, side windows, and glass roofs.

Technical Specifications

Suitable Surfaces

- Windshields
- Backlight/Rear windows
- Side window glass
- Glass roofs

Durability

3 months

Key Features

Hydrophobic, Anti-corrosive, Streak-free, Easy Application

Packaging and Logistics

Bottle Volume

100 ml
