Product Overview

High-Performance Air Chamber Solutions

This range hood air chamber series features a robust brushless motor paired with high-efficiency plastic blowers and impellers. Designed for seamless integration into range hood products, these units offer reliable airflow and durability. We provide flexible customization options for voltage, frequency, and motor shaft elongation to meet specific application requirements.

Technical Specifications

Performance Data

Model	Voltage (V)	Power (W)	Rotation (RPM)	Insulation
HB-01	220-240	185	2119	F
HB-02 (High)	220-240	163	1856	F
HB-02 (Low)	220-240	130	2400	F

Available Models

HB-01, HB-02, HB-03

Customization

Customizable Features

- Voltage
- Frequency
- Shaft elongation
- Impeller design
- Blower configuration
