

Rapeseed Oil Weighing Filling Machine

This high-precision weighing filling machine is designed for rapeseed oil and similar viscous liquids. It is equipped with a conveyor system for automated filling processes, ensuring consistent and efficient production.

Product Overview

Industrial Weighing Filling System

This high-precision weighing filling machine is engineered for the efficient packaging of rapeseed oil and similar liquid products. Designed for consistent production, it utilizes electronic scale integration to ensure filling accuracy within 0.35% FS. Its robust construction and automated nozzle system make it an economical and practical solution for demanding food processing and industrial packaging environments.

Technical Specifications

Filling Volume Range	5 KG
Filling Speed	80-120 barrels/hour (at 200kg capacity)
Filling Accuracy	d ± 0.35%FS
Filling Heads	1
Model Type	CZDG-B

Operational Requirements

Supply Voltage	220v/380v
Gas Source Pressure	0.7 Mpa

Key Features

Primary Benefits	High-Dose Precision, Electronic Scale Integrated, Mechanical Anti-drip, Economic Efficiency
