

Ratchet Terminal Crimping Tool

This ratchet-action tool is designed for crimping terminals. It is suitable for tube type pre-insulated terminals and pin terminal insulated or non-insulated ferrules.

Product Overview

Professional Ratchet Crimping Solution

This high-precision ratchet-style crimping tool is designed for reliable termination of tube-type pre-insulated terminals, as well as insulated and non-insulated ferrules. Featuring a robust 228mm frame, it provides consistent pressure to ensure secure electrical connections for various wire gauges. Its ergonomic design and ratchet mechanism make it an essential tool for professional electrical installations and maintenance tasks.

Technical Specifications

Supported DIN Sizes

- 1
- 2
- 3
- 4
- 5
- 6

Model	HS-40WF
Tool Length	228 mm
Supported AWG Sizes	20, 18, 16, 14, 12, 10

Key Features

Application Compatibility

Tube type pre-insulated • Pin terminal insulated • Pin terminal non-insulated • Ferrules
