

Ratcheting Hand Clamp

The ratcheting hand clamp is designed for securely holding workpieces. Its ratcheting mechanism allows controlled, adjustable clamping pressure.

Product Overview

Professional Ratcheting Hand Clamp

This versatile ratcheting hand clamp is engineered for secure and controlled workpiece stabilization in demanding environments. Featuring a robust, durable frame and ergonomic handles, it ensures both longevity and user comfort during extended use. The specialized quick-release mechanism allows for rapid adjustments, making it an ideal solution for woodworking, metalworking, and complex assembly tasks.

Technical Specifications

Clamping Mechanism	Ratcheting pressure control
Release Mechanism	Quick-release

Features

Construction

Robust Frame • Ergonomic Handles • Slip-resistant Jaws

Common Applications

Woodworking, Metalworking, Assembly
