System Overview

Advanced Real-Time Patrol Management

This advanced patrol device utilizes GPS and Beidou dual-mode localization to provide superior accuracy compared to traditional systems. It enables real-time data uploads to a central management system, allowing supervisors to track patrol routes and manage security personnel remotely. Designed for reliability and ease of use, it includes essential safety features like SOS, man-down alarms, and impact detection.

Core Capabilities

Overview of key technical features including localization, connectivity, and safety functions.

Localization Technology	GPS, Beidou
Connectivity	4G HD Voice Calls
Data Storage Capacity	60000 records
Reading Distance	3 cm

Hardware & Durability

Battery Capacity

5400 mAh

Battery Capacity

Protection Rating

IP67 Waterproof • Dustproof • Damage-Resistant

Physical Dimensions

125mm x 56.2mm x 27mm

Charging Interface

Magnetic USB Cable

Safety & Features

Safety Functions

- SOS Emergency Button
- Man-down Alarm
- Impact Detection
- Pedometer
- Alarm Clock
- Emergency Phone Number Presets (5 groups)
