Product Overview

High-Performance Rear Axle Bearing

This needle roller bearing and cage assembly is engineered for high load capacity and reduced friction in critical rotary applications. Designed specifically for Peugeot 206 rear arm systems, it features a hardened steel outer race and a precision-engineered cage that accurately guides needle rollers. This construction ensures even load distribution, prevents roller skewing, and maintains optimal lubrication for long service life.

Compatibility

Compatible Part Numbers

5132.72, 5132.71, 5131.48, 5131.49, DB70216, HK4719, SE8208, NE70214, FRS4726, SE8209, NE68934, FRS5024, SE8204, DBF68933, BK5026, SE8205

Technical Details

Construction Features

- Hardened steel outer race
- Precision-engineered cage
- High load capacity design
- Reduced friction geometry

Bearing Type

Needle Roller Bearing

Primary Application

Rear Axle / Rear Arm
