

# Rear Bicycle Safety Light with Reflector

This rear bicycle light features a high-efficiency LED for enhanced brightness. It includes a built-in, wide-angle reflector for added visibility.

## Product Overview

### Enhanced Visibility and Reliability

This rear bicycle light integrates a powerful LED system with a wide-angle reflector to ensure maximum safety for cyclists. Engineered for precision optics, it provides high visibility from both acute angles and significant distances. Its energy-efficient design minimizes battery consumption, while the durable construction ensures reliable performance under various weather conditions.

## Technical Specifications

### Performance Features

- High-visibility optics
- Energy-efficient design
- Weather-resistant construction
- Wide-angle illumination

### Recommended Use

Commuting • Recreational Riding • Touring

<b>Mounting Type</b>	Rack-mounted
<b>Lighting Technology</b>	LED, Wide-angle reflector
