Product Overview

High-Performance Rear Brake Linings

These rear brake linings are engineered specifically for heavy-duty bus applications, ensuring reliable stopping power and consistent performance. Constructed with advanced, asbestos-free friction materials, they provide excellent heat dissipation and reduced brake fade under demanding operating conditions. The design features precise dimensions and multiple ventilation holes for secure attachment and optimal safety.

Technical Specifications

Material Composition

Asbestos Free

Number of Holes: 26

Units per Box: 24

Model Variants

Model Specifications

Model	Arc Length (mm)	Width (mm)	Thickness (mm)
XML703	200	207	10.2/18
XML704	205	207	15.9/18.3
