Overview

Rugged Door Protection

These rear lower door panel inserts are engineered to provide maximum coverage and protection for occupants in 4-door off-road vehicles. Constructed from high-impact polypropylene panels secured by a robust steel tubing frame, they effectively shield passengers from mud, trail debris, and harsh environmental elements. The sleek, contoured design ensures a perfect, rattle-free fit that complements the factory aesthetics while delivering long-lasting durability in demanding off-road conditions.

Compatibility

Compatibility
