Product Overview

Precision Engineered Suspension Component

This rear suspension control arm is designed for specific vehicle fitment to ensure optimal handling and ride comfort. It is engineered to maintain proper wheel alignment and stability, effectively reducing noise, vibration, and harshness (NVH). Constructed from durable materials, this component is built to withstand rigorous road stresses and environmental conditions, meeting or exceeding original equipment standards.

Technical Specifications

Performance Features

- Maintains wheel alignment
- Enhances vehicle stability
- Reduces Noise, Vibration, and Harshness (NVH)
- Precise articulation

Component Type	Rear Suspension Control Arm
Compatibility	ALFA ROMEO

Quality Standards

Compliance

OEM Specification Compliant
