

Rear Wheel Hub Bearing Assembly

This rear wheel hub bearing assembly is compatible with INFINITI and NISSAN vehicles. It is engineered for a precise fit, ensuring smooth and safe operation.

Product Overview

Precision Rear Wheel Hub Assembly

This premium rear wheel hub bearing assembly is engineered for a precise fit on specific INFINITI and NISSAN vehicle models. Designed to meet or exceed OEM standards, the unit features a high-durability integrated bearing structure that minimizes friction and enhances load-bearing capacity. It serves as an ideal replacement component for restoring smooth driving dynamics, wheel alignment, and reliable braking performance.

Compatibility

Supported Models

- INFINITI I30 (2000-2004)
- INFINITI I35 (2000-2004)
- NISSAN MAXIMA (2000-2003)

Cross Reference

Part Numbers

512203, BR930403, BR930701, VKBA6981, 43200-2Y000, 43202-0L710, HUB188-6, RW8203

Performance Features

Key Attributes

OEM Specification Match • Integrated Bearing Design • High Load-Bearing Capacity • Friction Optimized
