

Rearview Mirror Actuator Switch

Actuator switch designed for rearview mirror control systems. This component facilitates the adjustment of the mirror's position, enhancing driver visibility and safety.

Product Overview

Professional Rearview Mirror Control

This rearview mirror actuator switch is engineered to provide precise control over mirror positioning for heavy-duty vehicles. Specifically designed for trucks and large buses, it ensures driver visibility and safety through reliable electronic adjustment. The component is built with durable materials, including newly developed flame-retardant housing options for enhanced automotive safety.

Technical Specifications

Material Features

Flame Retardant

Service Model

- Build to Customer Drawings
- Custom Sample Production

Primary Applications

Trucks, Buses, Heavy-duty Vehicles

Customization Capability

Yes
