

Rearview Mirror Defogger Membrane Heater

This membrane heater is designed as an auto part for rearview mirrors. It operates at 12V and has a power rating of 3W.

Product Overview

High-Performance Membrane Heater

This metal-foil heating pad is engineered specifically for automotive rearview mirror applications, providing reliable de-icing and defogging capabilities. Designed with a specialized serpentine resistance pattern, it ensures even heat distribution across the surface. With over 15 years of proven design experience, this component offers excellent resistance stabilization and no power damping effects, making it a dependable choice for automotive integration.

Technical Specifications

Performance Metrics

12 V

Voltage

3 W

Power

Operating Voltage	12 V
Power Rating	3 W

Design & Construction

Terminal Availability

- Various terminal types available

Key Advantages

High resistance stabilization • No power damping

Technology	Metal-foil heating, Serpentine resistance pattern
