

Recessed LED Downlight with Diffusing Lens

This LED downlight features a circular design with a diffusing lens. It is designed for recessed mounting and provides bright, uniform illumination.

Overview

Professional Recessed Lighting Solution

This recessed LED downlight is engineered for high-performance indoor illumination, featuring a sleek circular design with a white outer ring. Equipped with a specialized diffusing lens, it ensures uniform light distribution while minimizing glare. The integrated heat sink with radial fins provides effective thermal management, promoting long-term reliability and energy efficiency for demanding commercial or residential environments.
