Product Overview

Professional Recessed LED Downlight

This high-performance recessed LED downlight utilizes advanced Nichia-EMC technology to deliver high luminous efficiency in a compact form factor. Engineered with a deep-cup anti-glare design and accurate optical lenses, it provides soft, comfortable illumination suitable for high-end residential, hotel, and club environments. The integrated heat sink design ensures effective thermal management, extending the lifespan of the fixture while maintaining consistent performance.

CRI Rating

Lighting Features

High Luminous Efficiency, Deep Cup Anti-Glare, Accurate Optical Lens, Natural Color Saturation

Design & Construction

Thermal Management

Multiple channels of heat dissipation via vertical fins

Installation

Integrated design with spring-loaded clips for easy mounting

Applications

Recommended Applications

- High-grade residential districts
- Hotels
- Clubs
- Indoor lighting decoration
