

Recessed LED Downlight with Heat Sink

This energy-efficient LED downlight features a circular design with a faceted reflector to enhance light distribution. It incorporates a heat sink with vertical fins for efficient thermal management and is designed for recessed ceiling installation.

Product Overview

Energy-Efficient Lighting Solution

This recessed LED downlight is engineered for optimal performance and longevity. Featuring a sleek circular design with a white outer ring and a faceted reflector, it ensures enhanced light distribution for professional spaces. The integrated heat sink with vertical fins provides superior thermal management, contributing to low power consumption and an extended operational lifespan.

Design & Construction

Installation Type	Recessed ceiling installation
Design Features	Circular Design, White Outer Ring, Faceted Reflector

Technical Specifications

Key Benefits

- Energy-efficient operation
- Low power consumption
- Long lifespan
- Enhanced light distribution

Thermal Management	Integrated heat sink with vertical fins
