

Recessed LED In-Ground Uplight for Outdoor Lighting

This recessed LED in-ground uplight is designed for outdoor landscape lighting. Constructed with a stainless steel bezel and robust housing, it offers weather resistance and provides upward directional lighting.

Product Overview

Professional Landscape Lighting Solution

This recessed LED in-ground uplight is engineered specifically for demanding outdoor landscape applications. Featuring a durable stainless steel bezel and robust housing, it is designed to withstand environmental exposure while providing reliable upward directional lighting. It is an ideal choice for illuminating architectural features, guiding pathways, and accentuating garden elements with efficient, bright LED illumination.

Technical Specifications

Installation Type	Recessed In-Ground
Lighting Direction	Upward

Construction & Durability
