

Recessed Troffer Light Fixture

This recessed troffer light fixture is designed for drop ceilings. It features a specular parabolic louver to maximize light output and minimize glare.

Product Overview

Professional Commercial Lighting

This recessed troffer light fixture is engineered specifically for drop ceiling installations in commercial and office environments. Featuring a high-quality specular parabolic louver, it is designed to maximize light output while effectively minimizing glare for enhanced visual comfort. Constructed with a durable steel housing and a clean white finish, this fixture offers a reliable solution for uniform illumination and energy-efficient operation.
