Product Overview

Professional Grade Camping Lantern

This rechargeable LED lantern delivers a powerful 800 lumens of light, featuring a frosted globe design that ensures a consistent 360-degree illumination spread. Built for demanding outdoor environments, it combines a robust stainless steel cage for impact protection with a practical, foldable hanging hook. The integrated lithium-ion battery provides reliable power, while the IPx4 water resistance and 1-meter drop impact rating make it a dependable choice for camping, hiking, and emergency preparedness.
