

Rechargeable 9V Lithium Battery 350mAh

This rechargeable 9V lithium battery offers a capacity of 350mAh. It incorporates a built-in circuit protection board and is compatible with all 9V universal chargers.

Overview

High-Capacity Rechargeable 9V Lithium Battery

This rechargeable 9V lithium battery is designed for reliable, long-lasting power. Featuring a high capacity of 350mAh, it provides consistent energy for various devices. The battery is equipped with an integrated circuit protection board to ensure safe operation and is compatible with all standard 9V universal chargers.

Technical Specifications

Capacity

350 mAh

Rated Capacity

Battery Chemistry	Lithium-ion
Nominal Voltage	9 V

Safety & Compatibility

Safety Features	Built-in circuit protection, Overcharge protection
Charger Compatibility	Compatible with all 9V universal chargers
