

Rechargeable Battery Assortment

This assortment features a variety of rechargeable batteries. The collection includes cylindrical cells and battery packs in multiple sizes and chemistries.

Product Overview

Versatile Rechargeable Power Solutions

This rechargeable battery assortment offers a comprehensive range of power solutions suitable for diverse industrial and consumer electronic applications. The collection includes various cylindrical cell sizes alongside custom-configured battery packs, ensuring compatibility with a wide array of devices. Designed for reliability, these batteries feature multiple form factors and terminal configurations to meet specific voltage and capacity requirements.

Technical Specifications

Construction Types

Cylindrical Cells • Battery Packs • Exposed Terminals • Enclosed Casings

Available Form Factors

AA, AAA, C, D, Custom Packs

Application Suitability

Primary Applications

- Consumer Electronics
- Industrial Equipment
- Custom Electronic Devices
