

Rechargeable Battery-Powered Table Fan with LED Light

This rechargeable fan provides cooling during power outages or in areas without electricity. It can be powered by AC power when available, and automatically switches to battery power when AC power is interrupted.

Product Overview

Dual-Purpose Cooling and Illumination

This 12-inch rechargeable table fan combines efficient cooling with integrated LED lighting to provide a reliable solution for residential and professional environments. Engineered for versatility, it operates on both AC and DC power, ensuring continuous performance even during power outages. With a 5-blade design and built-in night light functionality, it serves as an essential emergency utility for spaces requiring dependable airflow and illumination.

Technical Specifications

Battery Capacity

4500 mAh

Battery Capacity

Blade Size	12 inches
Voltage	6 V

Features

LED Configuration	5-piece integrated night light
Power Modes	AC Powered, DC Battery Powered

Design

Design Type	5-blade tabletop fan
