

Rechargeable Digital Camera Battery 7.2V

This is a rechargeable battery designed for digital cameras and camcorders. It provides a long-lasting power supply with voltage regulation and overcharge protection.

Overview

Professional Power Solution

This high-capacity rechargeable battery is engineered specifically for digital cameras and camcorders requiring a 7.2V power source. It features advanced internal circuitry for voltage regulation and overcharge protection, ensuring safe and reliable performance. Designed for extended use, this lithium-ion pack provides consistent power output for professional photography and videography needs.

Technical Specifications

Energy Capacity

6.8 Wh

Energy

Nominal Voltage

7.2 V
