

Rechargeable LED Emergency Lantern

This rechargeable lantern features dual 8W fluorescent tubes for bright illumination. It can be wall-mounted and automatically lights up during power failures.

Product Overview

Reliable Emergency Lighting

This portable LED emergency lantern is designed for immediate illumination during power outages or outdoor activities. Equipped with dual 8W fluorescent tubes, it ensures bright and consistent light output. The unit features an automatic activation function that triggers the light when power failure is detected, making it an essential safety tool for professional and home environments.
