

Rechargeable LED Spotlight and Lantern

This is a portable rechargeable LED spotlight with a 161-degree view. It functions as both a high-intensity spotlight and a wide-angle lantern.

Product Overview

Versatile Illumination Solution

The TK-680 is a dual-function lighting device serving as both a high-intensity spotlight and a wide-angle lantern. Engineered for portability, it features a built-in rechargeable battery for cordless operation, making it ideal for camping, emergency preparedness, and general task lighting. Its durable plastic construction and ergonomic handle ensure reliable performance in both indoor and outdoor environments.
