

Rechargeable LED UV Illuminated 10x Loupe

This compact loupe features both LED and UV illumination for enhanced viewing. It is equipped with a 10x magnification triplet lens system and a USB charging port.

Product Overview

Professional Precision Inspection

This high-performance 10x magnification loupe is designed for precision inspection tasks in professional environments. Featuring an advanced triplet lens system and a 22mm aperture, it ensures clarity and minimal distortion. The integrated dual-mode illumination system provides both bright white light for general viewing and UV light for specialized security or authenticity verification.
