

Rechargeable Ni-MH Batteries

Rechargeable Nickel-Metal Hydride (Ni-MH) batteries are available in AAA, C, SC, and D sizes. These batteries are designed for various electronic devices, providing a sustainable power solution with capacities from 600mAh to 7000mAh at 1.2V.

Product Overview

Sustainable Power Solution

These high-performance Nickel-Metal Hydride (Ni-MH) rechargeable batteries are engineered for a wide range of electronic devices. By offering a reusable energy source, they provide a sustainable and cost-effective alternative to single-use batteries. With a consistent 1.2V output and multiple capacity options, they are designed to meet the diverse power requirements of professional equipment.

Technical Specifications

Nominal Voltage

1.2 V
Voltage

Capacity by Size

Battery Size	Capacity
AAA	600mAh
SC	2700mAh
C	4000mAh
D	7000mAh

Product Highlights

Available Form Factors	AAA, SC, C, D
Chemistry	Nickel-Metal Hydride (Ni-MH)
