

# Rechargeable Nickel-Cadmium (NiCd) Batteries

These are rechargeable nickel-cadmium (NiCd) batteries. They come in various capacities and voltages.

## Product Overview

### Reliable Rechargeable Power

These rechargeable Nickel-Cadmium (NiCd) batteries are designed for consistent performance across a variety of applications. Each cell operates at a standard 1.2V, providing a dependable power source for devices requiring reliable energy storage. With multiple capacity options available, these batteries offer flexibility to match specific power requirements for your equipment.

## Technical Specifications

### Available Capacities

- 300
- 800
- 1000
- 1600
- 5000

### Key Performance Metrics

**1.2 V**

Voltage

**5000 mAh**

Max Capacity

**Battery Chemistry** Nickel-Cadmium (NiCd)

**Nominal Voltage** 1.2 V
