

Rechargeable NiMH AA Batteries 2000mAh

These rechargeable AA batteries use NiMH chemistry. They have a 2000mAh capacity and are ideal for devices like cameras and remote controls.

Product Overview

High-Performance Rechargeable Power

These Nickel-Metal Hydride (NiMH) AA batteries provide a reliable and sustainable energy solution for professional and consumer electronic devices. Engineered for high-drain equipment, they offer a substantial 2000mAh capacity that ensures extended operational time. By supporting repeated charging cycles, these batteries help reduce long-term costs and minimize environmental impact compared to disposable alkaline alternatives.
