

Rechargeable Twin Tube Emergency Lantern

This rechargeable lantern features twin 6W fluorescent tubes. It can be wall-mounted and automatically illuminates during power outages.

Product Overview

Reliable Emergency Lighting

This rechargeable twin-tube emergency lantern is designed to provide dependable illumination during power outages. Featuring dual 6W fluorescent tubes, it offers broad area coverage and wall-mount capability for convenient placement. The system is engineered to automatically switch on when a power failure is detected, ensuring safety and visibility in critical environments.
