

Reciprocating Piston Air Compressor

This industrial-grade reciprocating piston air compressor is designed for demanding applications. It is equipped with safety features such as a pressure relief valve and thermal overload protection and is suitable for powering pneumatic tools, spray painting, and inflating tires.

Product Overview

Industrial Reciprocating Piston Air Compressor

This industrial-grade reciprocating piston air compressor is engineered for high-demand professional environments. It features a robust motor and a durable pump assembly designed for reliability and extended operation cycles. Equipped with a large-capacity air tank, it ensures consistent airflow for intensive pneumatic tasks, while integrated safety mechanisms provide secure and stable performance.

Key Features

Safety Protections

Pressure Relief Valve, Thermal Overload Protection

Applications

Suitable Applications

- Powering pneumatic tools
- Spray painting
- Tire inflation
