

Reciprocating Piston Air Compressor

This industrial air compressor is designed for heavy-duty applications. It features a durable pump and a large air tank for extended operation.

Overview

Industrial-Grade Reliability

This reciprocating piston air compressor is engineered for demanding heavy-duty applications in professional environments. It features a high-efficiency motor and a durable pump assembly designed to handle consistent workloads in workshops, construction sites, and manufacturing facilities. The integration of a large-capacity air tank ensures extended operational cycles, while advanced safety components provide consistent performance under pressure.

Safety & Features

Safety Features

Pressure Relief Valve, Thermal Overload Protection

Applications

Ideal Environments

- Automotive Workshops
- Construction Sites
- Manufacturing Facilities

General Specifications

Equipment Category

Reciprocating Piston • Industrial Grade
