

Recirculating Water Chiller for Reflow Ovens

This recirculating water chiller is designed to handle cooling requirements in reflow ovens. It features two temperature control modes: constant temperature and intelligent temperature control.

Product Overview

High-Efficiency Recirculating Cooler

The CW-6000 recirculating chiller is engineered to provide reliable cooling for reflow oven applications. It features advanced dual temperature control modes, including a constant temperature mode and an intelligent mode that automatically adjusts based on ambient conditions. This robust unit ensures consistent thermal stability, making it an essential component for demanding industrial heating processes.

Technical Specifications

Electrical Requirements

110 V

Min Voltage

220 V

Max Voltage

60 Hz

Frequency

Refrigerant Gases

R-22, R-410a

Tank Capacity

15 L

Performance Metrics

Flow and Pressure Capabilities

Metric	Range
Max Flow	13 - 70 L/min
Max Lift	10 - 53 M

Dimensions and Weight

Weight

60 Kgs

Net Weight

70 Kgs

Gross Weight

Dimensions (L x W x H)

67 x 47 x 89 cm

Packing Dimensions (L x W x H)

74 x 60 x 109 cm

Compliance and Standards

Certifications

CE • RoHS
