

Rectangular Duct Fan

This rectangular duct fan features a forward curved design. Certified to EAC, UkrSepro, and CE standards, it is suitable for various air system applications.

Product Overview

High-Performance Rectangular Duct Fan

This inline rectangular duct fan is engineered for efficient air movement in demanding HVAC systems. It delivers performance levels that meet European technical standards, ensuring reliable airflow and air pressure for supply, exhaust, and return air applications. Designed with a focus on operational efficiency, the unit combines high performance with low-noise characteristics for a balanced ventilation solution.

Technical Specifications

Duct Size Range	400x200 mm to 1000x500 mm
Material	Galvanized Steel
Impeller Type	Centrifugal
Motor	External Rotor Motor

Performance Features

Key Performance Indicators

1 Grade

European Standard Compliance

0 Low

Noise Level

Suitable Applications

Supply Air, Exhaust Air, Return Air, HVAC Systems
