

Rectangular Polarizer Filter

This is a rectangular polarizer filter. It enhances display clarity and reduces glare for various electronic devices.

Product Overview

High-Performance Rectangular Polarizer

This high-quality rectangular polarizer filter is designed for integration into display systems and electronic devices. Featuring a specialized textured surface with vertical striations, it effectively manages light transmission to enhance contrast and reduce glare. Its robust construction ensures consistent performance, making it an ideal component for professional-grade display assemblies.

Physical Characteristics

Form Factor	Rectangular
Surface Texture	Vertical striations
Border Design	White border frame

Application

Primary Applications	Display Systems, Electronic Devices, Monitor Assembly, Optical Filtering
