

Rectangular Ventilation Grille with Adjustable Slats

This rectangular grille is designed for ventilation. It features adjustable horizontal slats, a recessed handle, and mounting holes for easy installation.

Product Overview

High-Efficiency Airflow Management

This rectangular ventilation grille features adjustable horizontal slats designed to optimize air circulation in professional environments. Engineered with a central recessed handle, it allows for effortless removal or manual adjustment of airflow settings. The unit includes integrated mounting points in all four corners for a secure, flush-mounted installation.
